

GX SERIES LOGGING GRAPPLES

- Various sizes available to suit your application
- Independent jaw pivot points reduces overall wear and fatigue
- Hardened steel pins and bushes for maximum durability
- Optimized jaw shape for excellent multiple stem grip and holding power
- Heavy duty centre joint offers extended trouble free life
- Built entirely from high tensile steel to be rugged and give a long dependable service life

DUXSON GX SERIES LOG GRAPPLES bring new levels of performance and reliability to the market.

Professionally designed and manufactured in New Zealand, these grapples are for the high volume application that demands the best and therefore will deliver uncompromising performance in all types of logging applications.

Huge capacity, quick acting, powerful action and long life are just a few features to improve your throughput.

A lighter weight series (L) is also available for those with smaller base machines but still desire a large capacity.

Various snubber mounting options are available to simplify installation. Talk to us now.
